

**RESEARCH OF EFFICIENCY OF POLYFUNCTIONAL COMPOSITIONS
FOR DECONTAMINATION (DEGASSING) OF SURFACES INFECTED
WITH HIGH-TOXIC SUBSTANCES**

I.G. Vlasov, V.P. Mjalovitskiy, A.N. Sinitsyn, M.A Smirnov, A.D. Ukraintsev

Open Joint Stock Company the Institute of
the “Applied biochemistry and machine-building”
(OAO “Biochimmash”)

In the article the results of experiments on efficiency of various variants of polyfunctional “Decontil” composition for decontamination of surfaces infected by toxic chemicals are given. Work is executed together with experts of Military Academy of radiological, chemical and biological defense according to the contract about scientific and technical cooperation between Open Joint Stock Company the Institute of the “Applied biochemistry and machine-building” (OAO “Biochimmash”) and Military Academy.
